Cole Davignon and Brooks Jackson

THIS WEEK:
- Meet up with Brooks throughout the week to continue to work on the project/get the main parts started
- We will do this by creating a git repo, meeting up in study rooms, and generally talking throughout the week to meet up together
- Continue to show up to class to work on it and ask any necessary questions

NEXT WEEK:
- Try and meet most days, especially before the easter "break"
- Try and finish before deadline to get it out of the way
- Continue to show up to class to work on it and ask any necessary questions

SPECIFIC CODE:
- Continue to test endpoints with given code, works in RapidAPI site
- Write the 4 functions planned (Both):
    - getTeam(): takes the team value printed out and displays it on screen
    - getLeague(): takes the league value printed out and displays it on screen
    - getRanking(): takes the rank value printed out and displays it on screen
    - getGroup(): takes the group (East/West) value printed out and displays it on screen
- Work on UI (Both):
    - Use base I made in Canva, and get the basics done for it out of the way
    - Implement toolbar and recycleView
    - Continue to update it
